

Bryan Stanley's future could be decided in the next 30 days...

And that future could mean that Stanley becomes a permanent resident of the Mendota hospital. Stanley...who killed three men at an Onalaska church in 1985...was jailed this week after reporting that he's been feeling anxiety. The district attorney's office has little involvement in the process to decide whether Stanley is recommitted, but D-A Tim Gruenke says he would participate in Stanley's upcoming hearing. Stanley was released from Mendota three years ago...angering families of his victims, because they were not told ahead of time that he would be freed.
