

School Referendum Projects on Track

Wednesday, 17 November 2010 10:11

HVAC systems, security systems and door locksets and hardware....all projects under the \$35 million referendum Lacrosse voters approved back in 2008. So where are those projects at?

Joe Lavina says with great summer weather and good planning.....the district is on track to complete most of the projects at hand.

Still left to do.....replacing doors and door locks and new motion sensor security systems....all on track to be completed by June.
