

The final plans for Onalaska's 2nd Avenue/State Highway 35 reconstruction plans are off to the DOT.....with an early April construction date right around the corner. Deena Murphy says last May, the City got the ball rolling to develop the streetscape design for the Great River Road.

The project will enhance an 8 block area of the Hwy 35 corridor from Elm Street on the south to Poplar Street on the north, making the downtown area more attractive and friendlier to pedestrians and bicyclists. The streetscape design is a key component of the Waterfront Master Plan.
