

National Weather Service meteorologist Mark Gehring says a low pressure system is expected to track north of Wisconsin by Saturday and usher in warm winds from the south with temperatures forecast in the high 40s and maybe even 50s. Through Nov. 24, the average temperature in Milwaukee was 54 degrees. It was 53.8 degrees for Madison.

The current record-holding year is 1931. Through Nov. 24 of that year, the average temperature in Madison was 53.1 degrees and 53.8 degrees in Milwaukee.
