

Home Sales Post Gains in September

Monday, 21 October 2013 17:14

Another good month in La Crosse county for home sales. September sales were up ten percent for the month over last year in the county, just a little less than sales increased overall for the state for the same month. The state realtors association did measure a slight decrease for the median price in the county. Meanwhile year-to-date sales have increased by nearly seventeen percent in La Crosse county over last year. Better than the state increase of just under fourteen percent.
