

Carbon dioxide for people is bad because too much of it for us can be

fatal and lead to suffocation. And at this time of the year, the chances of this happening are greater than any other time of the year. La Crosse Fire Division Chief, Craig Snyder.

[\(Click for Audio\)](#)

Snyder says it is state law that you have at least one C.O. detector in your home on each level. If your own property and are a landlord.....you too must install detectors in those homes or apartments.
