

The numbers are out and they are dropping at Fort McCoy. Fort McCoy's total

economic impact for fiscal year 2013 was an estimated \$902 million, down from the just over \$1 billion in 2012.

Workforce payroll, operating costs and other expenditures totaled \$282 million for 2013 compared to \$317 million for 2012. The decrease reflects the impact of congressionally mandated sequestration, the furlough of civilian personnel and other personnel restrictions. A total of 2,443 personnel worked at Fort McCoy in 2013 and

approximately 72 percent of the workforce lives within Monroe County.
