

The Trempealeau County Board of Supervisors has gone on record as supporting one of two routes for the proposed new high-voltage power lines that are expected to run through the county. The supervisors favored the southern route between Alma and La Crosse.

In Lacrosse County.....if Board Member, Marilyn Padretti, has her way...there will no support for the CapX 2020 project at all.

The transmission lines have been proposed by CAPX2020, a consortium of power companies that includes Xcel Energy and Dairyland Power.
