

Monroe County Fire Damages Building

Thursday, 12 January 2012 07:48 -

A fire at a Monroe County business last night, caused severe damage to one of several buildings on the property. Firefighters were called out to Rockland Flooring just before 7 Wednesday night.

The fire looks to have started in an attic section of a building that houses tools. No injuries were reported.

The building where the fire occurred has severe smoke and structural damage. It's the second fire at the semi trailer flooring company in under a year.
