

Storm Cleanup Continues

Monday, 07 May 2012 10:49 -

Heavy weekend rains have caused several rivers and creeks to rise in southern Wisconsin. Jackson, LaCrosse, Trempealeau, Waushara, Winnebago and Green Lake Counties are all under a flood warning. On Sunday, several areas received more than two inches of rain.

This week, there is a chance for two additional systems to move across Wisconsin. The first system will cause afternoon showers on Tuesday. However, the storms are expected to bring less than an inch of rain.

In Trempealeau County, clean up continued throughout the weekend in the community of Blair following last week's storm. Classes resumed today at the Blair-Taylor Elementary and High Schools after being closed for two days due to roof damage caused by the storm. School officials are concerned that rain leaking through the roof may also caused damage to the gym floor. And in Juneau County, a communications tower was struck by lightning on Sunday.
