

Deer Ticks A Common Sight This Spring

Wednesday, 05 May 2010 11:02 -

A tiny pest came out early and in large numbers. LaCrosse county vector control manager Dave Geske tells us warm weather has brought out ticks. Especially deer ticks which carry lyme and other bacterial diseases. Geske says repellents will work. But, you need to follow directions and make sure you apply enough repellent to keep the deer ticks from making you their next blood meal.
