

CAUSE OF DEATH FOR CRAIG MEYERS

Thursday, 18 February 2010 14:19 -

A cause of death for the college student found in the Mississippi River this week. The LaCrosse county medical examiner Dr. John Steers says Craig Meyers drowned to death. Steers tells Wizzum News that the 21 year old college student also suffered from hypothermia alcohol intoxication. Meyers's body was found below the ice on Tuesday afternoon. Craig was last seen alive at 2am on Sunday when a relative dropped him off on the 700 block of Market Street.
